Addiction Research & Theory

*Included in the Thomson Reuters Social Sciences Citation Index**

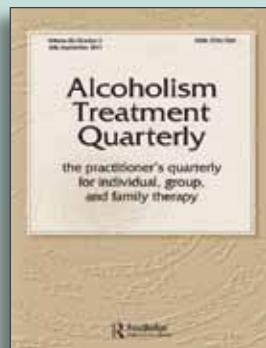

Addiction Research and Theory has been the leading outlet for research and theoretical contributions that view addictive behavior as arising from psychological processes within the individual and the social context in which the behavior takes place, as much as from the biological effects of the psychoactive substance or activity involved.

This cross-disciplinary journal examines addictive behaviors from a variety of perspectives and methods of inquiry. Disciplines represented in the journal include Anthropology, Economics, Epidemiology, Medicine, Sociology, Psychology and History, but high quality contributions from other relevant areas are also published.

Alcoholism Treatment Quarterly

The Practitioner's Quarterly for Individual, Group, and Family Therapy

Alcoholism Treatment Quarterly is an exciting professional journal for clinicians working with persons who are alcoholic and their families. Designed to bridge the gap between research journals and information for the general public, it addresses the specific concerns of professional alcoholism counselors, social workers, psychologists, physicians, clergy, nurses, employee assistance professionals, and others who provide direct services to persons who are alcoholic.

The journal features articles specifically related to the treatment of alcoholism, highlighting new and innovative approaches to care, describing clinical problems and solutions, and detailing practical, unique approaches to intervention and therapy. Original research and articles about theory development and policy issues in alcoholism are included. **Alcoholism Treatment Quarterly** particularly welcomes material giving the personal and humanistic aspects of professional alcoholism counseling and therapy from both the counselor/therapist's view as well as that of the client.

The American Journal of Drug and Alcohol Abuse

*Included in the Thomson Reuters Social Sciences Citation Index**

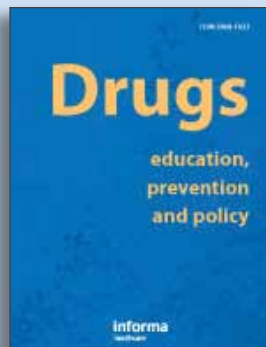

The American Journal of Drug and Alcohol Abuse is now published six times per year and provides an important and stimulating forum for the exchange of ideas between the diverse researchers examining the neurobiology, pathophysiology, and treatment of drug abuse and alcoholism, and includes a wide range of translational research from preclinical through clinical aspects of substance abuse and dependence. The Journal covers these topics with focused data presentations and authoritative reviews of timely developments in our field.

Articles in neurobiology may include molecular biology, cellular physiology, and human and animal pharmacology of abused drugs. Papers in pathophysiology cover behavioral pharmacology, neuroimaging, and family-genetic studies of assessments, pharmacotherapies, behavioral therapies, large-scale treatment follow-up studies, and new modalities of care.

Drugs: Education, Prevention & Policy

*Included in the Thomson Reuters Social Sciences Citation Index**

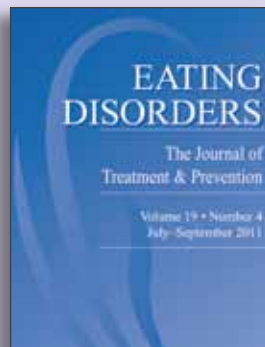

Drugs: Education, Prevention & Policy is a refereed journal which provides a forum for communication and debate among policy makers, practitioners and researchers concerned with social and health policy responses to legal and illicit drug use and drug-related harm. The journal publishes multi-disciplinary research papers, commentaries and reviews on policy, prevention and harm reduction issues regarding the use and misuse of alcohol, tobacco and other drugs. The journal encourages submissions which reflect different cultural, historical and theoretical approaches to the development of policy and practice.

The Editor welcomes contributions based on original research, policy discussion, evaluations of policy and practice, literature reviews, and papers which examine historical and cultural aspects of substance use and social responses to use and problematic use.

Eating Disorders

The Journal of Treatment & Prevention

Eating Disorders is contemporary and wide ranging, and takes a fundamentally practical, humanistic, and compassionate view of clients and their presenting problems. The journal adopts a multidisciplinary perspective that considers the essential cultural, social, familial, and personal elements that not only foster eating-related problems, but also furnish clues that facilitate the most effective possible therapies and treatment approaches.

A distinguished international editorial board ensures that **Eating Disorders** will continuously reflect the variety of current theories and treatment approaches in the eating disorders arena. From anorexia nervosa to bingeing to yo-yo dieting, editors and contributors explore eating disorders from a number of exciting, sometimes unexpected, and always thought-provoking angles.

International Gambling Studies

Launched by a team of international experts with a commitment to the highest scholarly standards, ***International Gambling Studies*** adopts a transnational and comparative approach to the challenges posed by the global expansion of gambling in the 21st century.

This peer reviewed interdisciplinary journal seeks to:

1. be a leading voice for analysis and research in gambling studies, presenting work on the theory, methods, practice and history of gambling;
2. encourage the application of perspectives from all social sciences including sociology, psychology, anthropology, statistics, economics, education, history, law, political science, community studies, management, industrial relations, leisure, and tourism studies;
3. advance excellence in gambling studies by integrating academic and industry perspectives, encouraging comparative studies and critical analysis;
4. encourage articles that offer a new theoretical argument, provide new data or use an innovative methodological approach or mode of analysis;
5. give theoretical and analytical expression to the intellectual and policy challenges in contemporary gambling;
6. enhance the public relevance of gambling studies in the context of contemporary society and global economic development.

Journal of Addictive Diseases

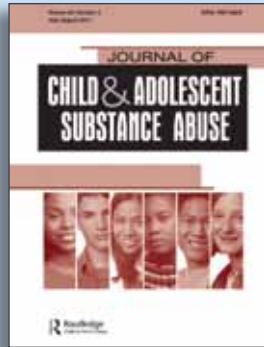

Official Journal of the American Osteopathic Academy of Addiction Medicine

*Included in the Thomson Reuters Social Sciences Citation Index**

Journal of Addictive Diseases provides original research on the vital issues and the clinical skills necessary to ensure effective practice. The latest research, treatments, and public policy issues in addiction medicine are presented in a fully integrated, multi-specialty perspective. Top researchers and respected leaders in addiction issues share their knowledge and insights on the most important research and practical applications.

The **Journal of Addictive Diseases** provides original research and reviews of the latest relevant findings in etiology, epidemiology, and clinical care. The journal is known for its scholarly commitment to the field, and reflects the highest standards of investigation, clinical practice, medical education, and evaluation of patient care. It presents the material from diverse aspects of the field: basic science, clinical aspects, self-help programs and philosophy, medical training issues, treatment outcome, and treatment evaluation perspectives.

Journal of Child & Adolescent Substance Abuse

*Included in the Thomson Reuters Social Sciences Citation Index**

The ***Journal of Child & Adolescent Substance Abuse*** addresses the treatment of substance abuse in children and adolescents. This is an essential forum for the dissemination of descriptive or investigative efforts with this population, and serves as a vehicle for communication and dissemination of information to the many practitioners and researchers working with these young people.

The ***Journal of Child & Adolescent Substance Abuse*** provides subscribers with one source for obtaining current, useful information regarding state-of-the-art approaches to the strategies and issues in the assessment, prevention, and treatment of child and adolescent substance abuse. Also, clinical case reports and descriptions of new and innovative evaluation and treatment methods are published. This enables the journal to provide a unique combination of clinical problems, solutions, and research findings.

Journal of Dual Diagnosis

Research and Practice in Substance Abuse Comorbidity

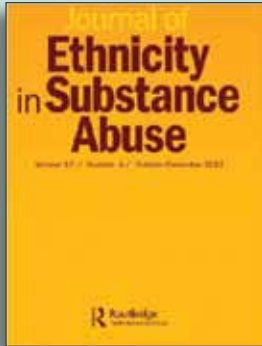

*Included in the Thomson Reuters Social Sciences Citation Index**

The ***Journal of Dual Diagnosis*** is a quarterly, international publication that focuses on the full spectrum of complexities regarding dual diagnosis. The co-occurrence of mental health and substance use disorders, or “dual diagnosis,” is one of the quintessential issues in behavioral health. Why do such high rates of co-occurrence exist? What does it tell us about risk profiles? How do these linked disorders affect people, their families, and the communities in which they live? What are the natural paths to recovery? What specific treatments are most helpful and how can new ones be developed? How can we enhance the implementation of evidence-based practices at clinical, administrative, and policy levels? How can we help clients to learn active recovery skills and adopt needed supports, clinicians to master new interventions, programs to implement effective services, and communities to foster healthy adjustment? The journal addresses each of these perplexing challenges.

The ***Journal of Dual Diagnosis*** includes articles and perspectives from four overarching domains relevant to the field: Psychopharmacology & Neurobiology, Psychotherapy & Psychosocial Issues, Services & Policy, and Clinical Forum. Each issue (although not necessarily each article within an issue) serves to encourage integration of these domains.

Journal of Ethnicity in Substance Abuse

Editor:

Peter L. Myers,
Professor Emeritus
Essex County College

Print ISSN: 1533-2640
Online ISSN: 1533-2659

The *Journal of Ethnicity in Substance Abuse* presents rigorous new studies and research on ethnicity and cultural variation in alcohol, tobacco, and other drug use and abuse. The research is drawn from many disciplines and interdisciplinary areas in the social and behavioral sciences and helping professions. The journal is an important addition to current addiction studies education, providing background knowledge and intervention techniques to educators, policymakers, and practitioners working with today's diverse client population.

The *Journal of Ethnicity in Substance Abuse* is an international forum for culturally competent strategies in individual, group, and family treatment of alcohol, tobacco, and other drug abuse. The journal also offers strategies for program development and evaluation, prevention programming, and harm reduction strategies that are ethnically or culturally appealing. This journal systematically investigates the beliefs, attitudes, and values of substance abusers, searching for the answers to the origins of drug use and abuse for different populations.

Journal of Groups in Addiction & Recovery

The ***Journal of Groups in Addiction & Recovery*** is the first peer-reviewed group therapy journal that attends to both the addiction and the mental health needs of clients. This journal offers an important forum for the diverse team of treatment providers, clinicians, educators, and researchers that serve addictions groups. It presents up-to-date clinical, research, and training articles involving a broad range of addictions and compulsive behaviors.

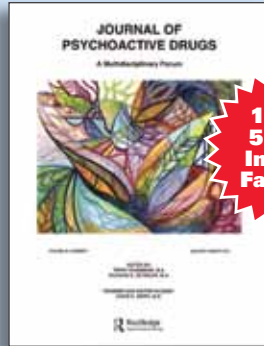

UPCOMING SPECIAL ISSUE FOR 2012

Broadening the Base of Addiction Mutual-Support: Bringing Theory and Science to Contemporary Trends

Guest Editors: William L. White and John F. Kelly

This special issue reviews the history of mutual support groups for addiction that have arisen as adjuncts or alternatives to Twelve Step Programs. Collectively, these trends reflect the cultural and political awakening of people in recovery and growing recognition and celebration of multiple pathways of long-term addiction recovery.

Journal of Psychoactive Drugs

A Multidisciplinary Forum

*Included in the Thomson Reuters Social Sciences Citation Index**

**New to
Routledge!**

Journal of Psychoactive Drugs is authoritative peer-reviewed periodical containing timely information of a multidisciplinary nature for clinicians and other professionals in the drug abuse field. The journal consistently addresses complex issues such as the disease concept of addiction, drugs and mental health, use and abuse of hallucinogens, ethnographic drug research, drug dependence and the family and more!

Throughout its forty-four year history, the ***Journal of Psychoactive Drugs*** has been on the leading edge of developments in the study of substance use and abuse from a multidisciplinary perspective.

It was the first journal established in the United States to focus on psychoactive drug abuse, and continues to introduce groundbreaking work in topics such as drug use and criminality, therapeutic communities, dual diagnosis, psychotherapy/counseling, methadone maintenance treatment, and culturally relevant substance abuse treatment.

Journal of Social Work Practice in the Addictions

The *Journal of Social Work Practice in the Addictions* is designed to help social work practitioners stay abreast of the latest developments in the field of addictions. This journal publishes refereed articles on innovative individual, family, group work, and community practice models for treating and preventing substance abuse and other addictions in diverse populations. The journal focuses on research findings, health care, social policies, and program administration directly affecting social work practice in the addictions.

The *Journal of Social Work Practice in the Addictions* has several regular features of interest to social workers in the field of addictions. Each issue contains a "Special Topic" column which consists of a discussion between experts or an interview with one expert about a particularly urgent issue in the field. Book reviews are included on the latest literature. A final column, called "Endpage," allows a single author to make his or her thoughts known, whether as a client in a program or as a professional who has something special to share.

Journal of Substance Use

Journal of Substance Use is a bimonthly international journal, publishing peer-reviewed, up-to-the-minute articles on a wide spectrum of issues relating to the use of legal and illegal substances.

The journal educates, informs, updates and helps set standards for health and social care professionals working with individuals and families with substance use problems. It also supports those undertaking research in substance use, developing substance use services, and participating in, leading and developing education and training programmes.

Journal of Substance Use adopts an eclectic stance and provides a forum for the discussion and dissemination around subjects of innovative and proven practice. This includes issues of prevention, treatment and policy while ensuring that issues are examined from a variety of perspectives. These perspectives include, clinical, managerial, service development, problem use, service use, and family. Papers may explore legal issues, therapeutic interventions and treatments, and behavioral approaches.

Journal of Addictions Nursing

The Official Journal of the International Nurses Society on Addictions

The ***Journal of Addictions Nursing***, the official journal of the **International Nurses Society on Addictions (IntNSA)**, is a peer reviewed, quarterly, international journal publishing original articles on current research, issues, practices and innovations as they relate to the field of addictions. Submissions are solicited from professional nurses and other healthcare professionals engaged in treatment, prevention, education, research, and consultation.

Each issue of the ***Journal of Addictions Nursing*** contains original full-length papers as well as several regular feature sections:

- **Perspectives** features points of view and commentaries on relevant issues
- **Resource Watch** provides summaries and critiques of books, videos, and CAI
- **Innovative Roles** examines unique roles that nurses in addictions are implementing
- **Research Reviews** offers summaries and critiques of research studies in the field

The journal publishes occasional special issues that explore important topics in the field of addictions nursing in depth. The Journal also offers continuing education credits for nursing addiction professionals.

Mental Health and Substance Use

Editor-in-Chief:

David B. Cooper,
Horsham, UK

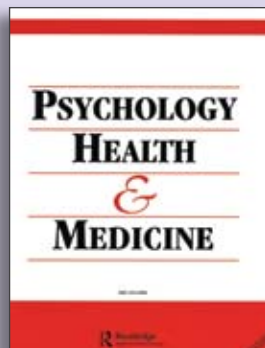

Print ISSN: 1752-3281
Online ISSN: 1752-3273

Increased recognition of co-existing mental health and substance use issues over the past 20 years has led to a growing body of discussion and research into the efficacy of interventions, treatment, and service delivery. As knowledge and expertise advance, professionals at the forefront of the field need an effective and stimulating forum in which to share information, review strategies, and develop new concepts.

This international and interdisciplinary journal provides a single authoritative source of reference for clinicians, managers, service developers, researchers, educators, trainers, and students. The journal's primary aim is to explore the complex issues arising from co-existing issues in mental health and substance use.

The journal informs, develops, and educates professionals by facilitating, sharing, and pooling knowledge. It covers assessment, intervention, treatment, prevention, innovation, opinion, conceptual exploration and analysis, service delivery, service development, policy and procedure, research and debate.

Psychology, Health & Medicine

Psychology, Health & Medicine reports on issues of psychology and health in practice. The journal reaches an international audience, highlighting the variation and similarities within different settings. Examining the wide range of applied health and illness issues and how they incorporate psychological knowledge, understanding, theory and intervention, the journal reflects the growing recognition of psychosocial issues as they affect health planning, medical care, disease reaction, intervention, and management.

For many years theoretical research was very distant from applied understanding. The emerging movement in health psychology, changes in medical care provision and training, and consumer awareness of health issues all contribute to a growing need for applied research. This journal focuses on practical applications of theory, research and experience and provides a bridge between academic knowledge and health care practice.

Psychology & Health

The Official Journal of European Health Psychology Society

*Included in the Thomson Reuters Social Sciences Citation Index**

Psychology & Health promotes the study and application of psychological approaches to health and illness. Articles discuss the work on psychological aspects of physical illness, treatment processes and recovery; psychosocial factors in the aetiology of physical illnesses; health attitudes and behavior, including prevention; the individual-health care system interface, particularly communication and psychologically-based interventions.

The journal publishes original research, and papers describing rigorous empirical work, including meta-analyses. Those outlining new psychological approaches and interventions in health-related fields are also published.

Popular past articles have discussed the theory of planned behavior, health promotion from the perspective of social cognitive theory, as well as other topics concerning psychology and health.

Sexual Addiction & Compulsivity

The Journal of Treatment & Prevention

The Official Journal of the Society for the Advancement of Sexual Health

Now being understood and treated as a significant and widespread disorder, sexual addiction and compulsivity is an enormously complex problem that requires a multidisciplinary approach from psychiatrists, psychologists, social workers, family therapists, pastoral counselors, and law enforcement personnel.

The first and only journal devoted to topics pertaining to this growing illness, ***Sexual Addiction & Compulsivity: The Journal of Treatment and Prevention*** is a quarterly, peerreviewed journal that provides a forum for research and clinical practice. As the source for information in this expanding new field, this journal will give practicing clinicians useful and innovative strategies for intervention and treatment from the necessary multidisciplinary perspective.

Men, Addiction, & Intimacy

Routledge Series on Counseling and Psychotherapy with Boys and Men

In the substance abuse and addiction treatment realm, males outnumber females two to one. While gender-issues are seen as a key element of women's treatment, the acknowledgement that males are "gendered beings" who have lived lives full of male-specific developmental challenges is often overlooked.

This text takes a developmental lifespan approach to examine the neurobiological and psychosocial factors associated with substance use disorders for males, specifically in relation to emotional growth and awareness, and how these areas, in turn, affect the development of healthy relationships. Theoretical concepts from the field of interpersonal neurobiology, the psychology of boys and men, and the substance abuse and addiction literature are interwoven with practical clinical examples to help elucidate how the notion of fostering emotional development can strengthen the treatment and recovery processes with boys and men.

Relevant case examples are included that illustrate work with males of all ages and address a variety of factors associated with culture, ethnicity, race, religion, and sexual orientation. Mental health practitioners will find this a valuable guide to understanding male development in relation to substance use and abuse and providing more comprehensive, gender-responsive counseling and assessment practices.

Addictions

Clinical Psychology: A Modular Course from Psychology Press

The first edition of **Addictions** established itself as a valuable resource for students and professionals alike. This authoritative new edition builds on the success of the previous book, incorporating advances in research and practice over the last ten years.

The book includes material on:

- the nature of addiction and who becomes addicted
- health consequences of alcohol and other drug dependence
- theories and causes of addiction.

The authors, experts in the field, also include new material on the controversy surrounding the possible positive effects of alcohol and cannabis use, the increased risk of interpersonal violence, and new research on theories of addiction. **Addictions** will be essential reading for students, professionals and researchers seeking state of the art information about this rapidly growing field.

Contingency Management for Substance Abuse Treatment

Isn't it unethical to pay people to do what they should be doing anyway? Won't patients just sell the reinforcers and buy drugs? Others didn't get prizes for not using. Why should they?

The concerns surrounding Contingency Management (CM) are many and reflect how poorly understood and rarely utilized this evidence-based treatment model is in practice settings. Despite being identified as the most efficacious intervention for substance use disorders, a significant gap persists between research and practice, at the client's expense.

Nancy Petry, an experienced researcher and consultant for organizations such as the National Institute of Health, has begun to fill this gap by authoring the first clinician-oriented text that focuses on CM protocol development and implementation. In this well organized and clear book she provides a foundation for understanding CM and details how to design and implement a program that can work for any clinician, whether he or she works for a well-funded program or not.
